PAPER PROTECTIVE PACKAGING SOLUTIONS

IN-THE-BOX PACKAGING

OUT-OF-BOX PACKAGING

LOAD SECUREMENT

PALLETTIZATION
SEARCHING FOR WAYS TO LOWER TOTAL PACKAGING COSTS WHILE IMPROVING SUSTAINABILITY?

Meet Hexacomb.

Hexacomb’s paper-based protective packaging materials offer a unique combination of strength and light weight. This allows you to maximize protection while reducing material usage, minimizing labor and lowering transit costs. HEXACOMB® honeycomb’s exceptional performance also lowers your costs by decreasing damage and returns.

HEXACOMB IN-THE-BOX PACKAGING

Protective packaging that fits inside a corrugated box and firmly secures the product in transit.

- Die cut, assembled, or otherwise fabricated to the shape of the object being packed in the box.
- Decades of proven engineered solutions and custom designs.
- Ideal replacement for expanded polystyrene (EPS) that doesn’t crumble or shed and is fully recyclable. Available in identical thicknesses as EPS.
- Good shock resistance and cushioning performance
- Paper-based packaging is environmentally-responsible since it is made primarily from renewable forest resources.
- Provides a clean surface for further printing or marking.

HEXACOMB OUT-OF-BOX PACKAGING

Protective packaging designed to provide superior damage prevention for large or bulky items.

- Corner and edge protectors reduce damage of products in transit.
- Custom designs optimize the volume of packaging material required for protection. This reduces waste and handling of excess packaging.
- Reduces product damage and freight claims through improved protection of your valuable goods.
- Reducing packaging weight in transit reduces freight costs and improves carbon footprint.
- Easily recyclable in most local paper waste streams.
WE ENCOURAGE YOU TO EXPERIENCE THE POWER OF PAPER FOR YOURSELF.

Stand on our material. Subject it to vibration. Cushion heavy products. We can take it.
Let us demonstrate how Hexacomb honeycomb can power through your most challenging packaging applications, while improving your bottom line and environmental profile.

HEXACOMB LOAD SECUREMENT SOLUTIONS

Versatile products that minimize load shifting and prevent product damage in transit.

• Meets the "European Best Practice Guidelines on Cargo Securing for Road Transport," issued by the Directorate-General for Energy and Transport, Road Safety Unit.

• Honeycomb panels secure palletized products, or combine with drop-down void fillers and air bags to provide optimum load securement.

• Lightweight and strong, providing superior compression strength.

• Easy to handle for faster loading and durable enough to be used for multiple shipments.

• Ideal for longitudinal (front-to-back) voids.

• Custom-sized to match your application at no extra charge, minimizing costs and reducing waste.

• All components can be recycled, reducing waste disposal costs and landfill space.

HEXACOMB PALLETIZATION

A superior combination of strength and lightweight compared to wood pallets.

• Hexacomb’s paper pallets are 60% lighter weight than wood pallets, saving shipping costs.

• Preferred over wood pallet when non-standard sizes are required. Custom sized pallets can match the shape of your load. A custom designed paper pallet is more economical than a standard wood pallet when minimal overhang/underhang is required.

• A better choice when one-way shipments require a disposable solution. Paper pallets are easily recycled with other paper products in corrugated waste streams.

• Compliant with ISPM15 regulations for export using a non-wood material.
HEXACOMB
Hexacomb is the leading global manufacturer of a high-performance paper product used in a wide variety of industrial applications. With 14 established plants worldwide, we aid in the reduction of shipping costs and delivery times.

Hexacomb’s international presence maximizes the availability and assortment of honeycomb commercial products to offer ideal industrial packaging and custom packaging solutions.

CUSTOM PACKAGING
Protect your product from start to finish, beginning with industrial packaging designs specifically customized to meet your unique demands and challenges – whether appliance packaging, automotive packaging, paper transport, industrial parts shipping and more.

Hexacomb’s experienced design and engineering teams will collaborate directly with you to develop industrial packaging and custom packaging solutions for optimal product protection.

Our expert designers work from Hexacomb design centers across the globe using state-of-the-art equipment and standards. Hexacomb is also extremely operation-friendly.

Based on your specific employee manual operations and robotic requirements, Hexacomb collaborates with you for easier integration.
